

Use-Of-Force Manager

This program is designed to better prepare a department to implement a Use-of-Force Management Program. Instruction is given on creating a road map for managing the use-of-force, so that managers can better assess the needs of their agencies and give better training to officers. Officers then become more confident that they can do their jobs properly and safely, and community trust is fostered through the complete, thorough review of use-of-force incidents, with corrective action taken, if needed.
