

RedMan® Instructor

This program is designed to prepare the instructor to train and supervise demonstrators in the proper use of RedMan® Training Equipment. Decades of “lessons learned” have taught RedMan Instructors that they should not be wearing the RedMan® Equipment. Instead, these instructors should be supervising properly trained and supervised demonstrators who are wearing the protective equipment. Supervisors should “supervise” training drills and simulations, not be a part of the melee. Only then can training drills and simulations be conducted effectively, realistically, and, most of all, safely. The entire course is based on the premise that the instructor will go back and train and supervise a cadre of properly selected and trained demonstrators.

This course will develop the building blocks to assist instructors in developing the skills necessary to lead to future training scenarios. Using the “isolation exercise” concept, instructors will understand, participate in, and learn how to train their demonstrators in how to cover this crucial middle ground.

Topics covered:

- Learn the parameters of use & misuse, correct sizing, proper donning, correct use & care, sanitation, equipment repair, and repacking & storage of the RedMan® XP Suit including Climatization Drills
- Review RedMan® Product Guide, Warnings & Cautions
- Seven Levels of Simulation
- Training Injury Liability Management
- RedMan® WDS Suits with marking cartridge
- Isolation Drills
- Scenario based simulations.

Duration: 3 Days

Tuition: \$595.00

Ammunition: None

Equipment Required: Appropriate Instructional clothing and footwear, cloth elbow & knee protection, whistle & lanyard, appropriate duty belt holster, training firearm if available, inert aerosol spray with holder, training baton and holder, and handcuffs, handcuff case, and handcuff key.
